

**Beautifully bespoke doors and windows**

# INTRODUCTION

Welcome to Valdi home of beautifully bespoke doors and windows.

Hopefully you will have met us at one of the many shows throughout the UK and had the opportunity to talk with one of the team about your project. If this is not the case then we urge you to speak with us at the earliest opportunity to discuss your plans and see how our products can be made to suit your needs.

We have been producing bespoke joinery since 1995 and specialise in folding sliding doors. In recent years we have expanded our core product range to include all types of windows, and doors as well as aluminium products in different styles to suit different budgets. We also produce high tech thermal front doors that are available in either contemporary or traditional styles via our "Bold as Brass" web site.

From day one our attitude has always been to take our time with clients and to look at each project carefully, creating a package that is as individual to a property as it is to you. This kind of approach would normally come at a premium, however we prefer to offer the best products and services at realistic prices.

Our products continue to lead the way not only in design but also in manufacturing techniques and technology that are often missed by even the professional eye.

Whether you have grand designs for a new home or simply need a replacement window we can help. Public, professionals, trade and commercial clients are all welcome and we thank you for considering Valdi.

## TILT & TURN WINDOWS

Tilt and Turn windows are becoming more popular in the UK. These windows are multifunctional as they open inwards by turning the handle 90 degrees - opening like a normal window or door. By turning the handle 180 degrees allows the top of the window to tilt towards you (inwards), giving ventilation without compromising security.

Sash windows have been around for over 100 years and are still loved today, Valdi have kept many traditional features and perfected on areas of weakness seen in original windows. Our design utilises modern seals, locks and double or triple glazing.

We offer three main styles of sash windows. The traditional style with weights and pulleys designed to closely match existing Victorian or box sash windows. The second and third types are produced in virtually the same way both using modern spring balances that are cheaper and easier to repair than weights and pulleys, without compromising on the traditional look of the window. The only main difference is that of a tilting system that is available for fire egress, extra air flow and ease of cleaning. To finish the look various heritage and historic glazing bars are available.

# CASEMENT WINDOWS

Our premier choice window, with their smart fuss free profile that compliment perfectly with the style of our single, French and folding sliding doors.

Additionally windows can be crafted with ovolo beading and glazing bars to add some character when fitting them in period or cottage type homes. Depending on your requirements, our windows can also be designed to feature our floating mullion which will provide excellent means of escape in the event of a fire. Don't forget our Europa 3G range with triple glazing making it the must have window for superior energy efficiency.

Aluminium doors and windows are also available.

We have different styles to suit your needs and budget.

Speak to one of our team for further details

**Valdi**  
ALUMINIUM

If trickle vents are required they can be vented through the head making them invisible from the outside.

Windows are fitted with a double weather seal for increased resistance to wind and rain.

Bespoke windows made to exact requirements, available in oak, mahogany and softwood.

All windows are fitted with friction hinges and a multipoint locking system as standard.

External glass can be cleaned from the inside by using the simple Easy Clean hinge adjustment, allowing the window to be moved centrally.

Typically 1.1U value with double glazed argon filled units.

Alternatively triple glazing can be fitted, reducing as low as 0.7U Ideal for green homes or areas of high noise levels

**Valdi**  
Europa

Extended 100mm, 75mm or 50mm sills are available. Alternatively 10mm stub nosed sills can be made when fitting onto existing stone sills, extra large sills are available on request for eco homes.

Windows can be top, bottom, left or right hung depending on your requirements.

They can also be locked partially open for night venting.

Locking handles in a range of colour choices

Typically fitted with laminated glass for added security and resistance to manual attack. EN356 P2A

Flush faced, with/without 4 types of glazing bars in any pattern. Perfect for conservation areas, or modern homes.

- UK company with experienced skilled craftsmen.
- In house deliveries no couriers are used.
- Full fitting service and site surveys.

Almost every house will have a single door somewhere, and it may also be one of the busiest in the house.

Many of our clients want a complete package from Valdi and as a result achieve the matching look with all their doors and windows. Bespoke designs, irregular sizes and insulated doors are all easily achieved and our expert team can work with you and your chosen professionals to advise and help create the final look of your home.

The option of 4 types of glazing bars and astragals can be added to all products for extra character. Ideal for period styled homes.

Multipoint locking systems available on all doors giving you extra peace of mind.

Fully adjustable hinges, enabling you to have total control of the doors with a simple turn of a screw. Traditional and concealed hinges are available on request.

Factory finished in Teknos or Sikkens with a huge range of wood stains and an almost infinite choice of paints from the RAL and NCS colour ranges

Trickle vents can be vented through the head so they are invisible from the outside.

Different sill types and configurations for inward and outward opening doors.

All products come fully finished ready for installation. We are happy to provide a site survey and/or fitting on all of our products.

\*Some very large panels may come unglazed due to the weight.

# FIXED GLAZING

Valdi Ltd - info@valdi.com - 01353 650000

Producing bespoke joinery since 1995

What ever your project, we would be happy to discuss your needs and offer a professional assessment of your projects requirements.

Utilising fixed and gable glazing can create a touch of brilliance to a project. If used in the correct place it can provide extra light, offer you a fantastic view or just simply change the look of a drab or hard imposing wall. Various styles or designs can be manufactured to create the right look. From tall angled panels or arched windows to long horizontal apertures and gable end glazing. We can also advise on the best ways to hide steels and ugly structural elements which is why we encourage customers and architects to involve us at the earliest opportunity.

Various sill sizes are available including extra large projections for eco homes.

Fixed panels can be produced to match other gable glazing. Alternatively fixed panels can be made with a dummy frame to match folding sliding doors, french doors and single doors creating a uniform appearance.

Triangular and odd shaped glazing, including bespoke design to incorporate building elements.

Full CAD drawings or design available

All Valdi products can be glazed with various types of glass. From our standard laminated glass offering both safety and security to solar reflective and self cleaning glass. Or even triple glazing as low as 0.7U value.

Various shades and colours of wood stain are available from our Sikkens and Teknos range. Paint colours are also offered in RAL and NCS ranges.

Extra cladding and beading can be manufactured to produce the perfect finish.

- Unique techniques used in our production.
- Superior technology from Europe and Australia.
- Insurance backed warranties.

All our items are bespoke and where ever possible we will accommodate your needs.  
In addition our products are designed to be easy to use for people with disability.

Folding Sliding Doors are what we specialise in, and having done so for many years we lead the way in quality and integration of new technology. The beauty of folding sliding doors is that an opening once restricted by width to French doors or patio doors can now be fitted with these, allowing you to open part or all of the doors in various directions, creating a clear unobstructed space.

At Valdi we have used our years of experience to make sure that you get the best set of doors available using manufacturing techniques that are not obvious to the eye even for the trained professional.

Don't want timber?  
No Problem!

Valdi offer a number of aluminium ranges. Depending on your project requirements we can advise you of the product that will best suit the look you require as well as your budget.

Contact us about  
the Valdi  
Aluminium range  
01353 650000.

WE CAN ALSO SUPPLY FULL U VALUE CALCULATIONS

Mortise and tenon and comb joints demonstrate our craftsmanship and commitment to durability and strength.

All products come fully finished ready for installation. We are happy to provide a site survey and/or fitting on all of our products.

\*Some very large panels may come unglazed due to the weight.

- UK company with experienced skilled craftsmen.
- In house deliveries, no couriers are used.
- Full fitting service and site surveys.

Often we advise customers to consider sliding doors in homes that have beautiful views that you don't want to be obstructed by multiple panels. They are also useful in areas that have restricted access and won't accommodate inward or

outward opening folding sliding door systems. Our systems work on a simple lift of the handle raising the door slightly to allow an effortless movement, dropping the handle secures the door in the desired position, great for leaving the door slightly open or to stop small children from moving the door.

Glazing panels can be up to 2.5m in size. Various options are available for glazing including sandblasted or etched glass or the inclusion of glazing bars.

Using lift and slide technology the door opens and closes with ease, whilst allowing you to stop the door in any position

Full choice of sill types available to accept decking, patio slabs or simply as a room divider as shown.

\*bespoke configurations

Various door configurations available from a single door to a three or even six panel system.

Door style designed to match other products.

Our in house fitting team provide a professional service, offering installations on all products with additional benefits of insurance backed warranties and our professional memberships for peace of mind.

# FRENCH DOORS

Not every area is big enough for folding sliding doors, and not every home requires them. French doors have been a staple part of homes for decades and can vary as much in height and width as they can in style.

We have designed our doors to offer the same matching look as our other products along with exceptionally high levels of security and ease of adjustment that customers have come to expect with our other door systems. Whether you need just a simple set, or ones with double side lights and top light we can accommodate all your ideas.

## ARCHITECTS - SIGN UP!

Contact us about joining our professional database. Thousands of architects already benefit from .dwg files, technical data and news about the latest updates and developments. Speak to one of the team today or email us: 01353 650000 - [info@valdi.com](mailto:info@valdi.com)

Door style designed to match your folding sliding doors. Your choice of configurations and styling such as glazing bars.

## GREEN OAK PROPERTIES

Planning a build using green oak? Speak with one of our team so that we can advise you on the options and best methods of glazing your home

**Fittings** With premium products comes a premium service and at Valdi we are proud to offer our clients a comprehensive and highly professional fitting service.

We can fit all types of products from folding sliding doors, through to windows and front doors. Quotes will come with a cost for delivery and fitting allowing you to buy from a company who offer a complete package, and our professional memberships give you extra peace of mind.

All our fitters are highly trained and experienced with our products. As well as having good general building skills and as such they can work directly with site formen and architects.

**Site Surveys** Whilst many of our clients are happy to supply us with their own dimensions we are able to offer customers a site survey. We can give advice on design and build aspects along with taking all the necessary measurements for production.

**Deliveries** In house deliveries mean that your products are delivered with the same care that they were made with. It also allows us to stay in direct contact with our drivers so that you know when deliveries are due, enabling you to carry on with your day.

**Architects** Involve us at an early stage and we can help advise you on the best techniques and ways of achieving the look you require for your client. By signing up to our professional database you can benefit from the latest news and technical information, as well as direct access to our .dwg CAD files enabling simple integration into your drawings.
